HE SAFE WAY: CAMERA SYSTEMS FROM LUMINATOR

“Video security solutions” ensure improved operational safety in public transport vehicles. But an onboard camera system from Luminator offers operators and manufacturers additional security: in operations and support, purchase and delivery guarantee, good documentation, effective engineering and long-term reliability due to advanced, upgradeable network technologies. Gothenburg also chose us when it came to the new vehicles for Route 100.

Vårgårdabuss, the operator responsible with buses from Volvo and Scania, has been trusting in top-quality, state-of-the-art camera systems from the present-day Luminator since 2012. Its buses operate in Gothenburg and other parts of Sweden. The modular hardware is long-lived, easily assembled and maintained, and works reliably even under harsh environmental conditions. The software is straightforward, deliveries are scalable according to the wishes of the client. Our service teams guarantee fast, competent onsite support.

This enables Vårgårdabuss to offer the standard of reliability and functionality its customers call for: modern, reliable video and recorder technology, and service over the entire vehicle cycle of about 10 years. Vårgårdabuss passes this trust on to all passengers and employees who use their buses –ensuring further reliability: attractiveness as a provider and employer in the public transport sector

MORE SECURITY WITH VIDEO SOLUTIONS FROM LUMINATOR

CHALLENGES

Kamerasysteme als Videosicherheitslösung für Passagiere und Fahrer. Und mehr Sicherheit für Städte, Betreiber und Fahrzeughersteller in der Produktion und im Betrieb.

SOLUTION

Langjährige Erfahrung mit Videolösungen im ÖPNV, qualitativ hochwertiges Produktdesign mit schnellem Service – d.h.: langlebiges, wartungsfreundliches, ausbaufähiges Produktdesign auf dem neusten Stand der Technik; Logistik: Just-in-time Lieferfähigkeit; Supportteams vor Ort

RESULT

In Luminator, municipalities, operators and manufacturers find a trustworthy, flexible, logistically strong and highly innovative partner that offers its customers and employees what they want: a safe journey in attractive public transport.

“It’s a matter of finding solutions for the respective constellation from required functionalities and established structures: our services must harmonize with the client’s specifications, the operator’s entrepreneurial and operational needs, and the manufacturer’s technical-logistical requirements. We have this capability because we dispose of the necessary experience, technology, service network and size.”

Peer Rott, Sales, Luminator
