

MULTI-SYSTEM CONTROLLER

PASSENGER INFORMATION SYSTEM

FEATURES

- Upload message listings remotely, via USB or Ethernet
- Compatible with all Luminator displays
- Integrate with rear-view cameras for on-screen display when vehicle is in reverse
- Multiple discrete inputs
- System monitoring displays diagnostic information with the option to download reports for further evaluation

FLEXIBLE AND INTEGRATED CONTROLS

The Multi-system Controller provides a single control interface to multiple on-board systems. Compatible with all Luminator displays - destination and infotainment, the Multi-system Controller enables quick and easy updates to message listings wirelessly, via USB, or Ethernet

INTUITIVE OPERATOR CONTROLS

The compact design and touch-screen display combined with user-friendly menus allows operators to easily update interior and exterior communications to riders. Diagnostics and integrated rear-camera display enhance safety and efficiency of operations.

MULTI-SYSTEM CONTROLLER

PASSENGER INFORMATION SYSTEM
