

FOR IMMEDIATE RELEASE

Plano, Texas December 27th, 2024

Luminator Technology Group Provides Innovative Transit Destination Signs and Advanced Software Integration

Luminator Technology Groups' innovative destination signs have been set to transform the way that commuters interact with public transportation. These state-of-the-art signs utilize advanced LED technology to provide clear, bright, and easily readable information, ensuring passengers can navigate transit systems with ease and confidence.

The destination signs offer advanced features such as:

- Customizable messages and real-time updates
- Seamless integration with existing transit infrastructure.
- 12-year warranty
- Available in white, amber, and color. Our colored Spectrum signs support 4,000 colors, providing optimal visibility and high-impact designs.
- The signs are powered by our Luminator Software Suite, which allows direct access to all connected devices in your fleet through a single, web-based user interface. Benefits of the software include remote access to shorten downtime of vehicles, centralized control of your fleet in just one app, security of data transfers, and quality assurance through reporting.

The enhanced feature will show in 1% increments. "As the demand for Electric Buses continues to grow, Luminator is in the position to provide benefits that streamline operations, so drivers know the bus is charged and ready for service" said Daria Van Engelen, Commercial VP, NA.

For more information about our destination signs or to do a pilot test, visit our website at www.luminator.com.

About Luminator Technology Group Global, LLC

Luminator Technology Group delivers globally recognized technology solutions that increase intelligence, safety, and efficiency for public transit operations. Luminator Technology Group (Luminator) was established and is purposefully architected to make a lasting impact on the transit technology market. Combining strategic research and development with smart acquisitions, we are merging a broad range of expertise and innovative technology along with best-in-class products from successful, well-known regional companies into one cohesive, global organization.

Luminator is uniquely positioned to provide solutions to connect transit passengers to vital information while supporting the operational objectives of efficient transit operations. Supporting transit bus and rail car manufacturers as well as public transit operators around the globe, Luminator is developing and delivering technology with tangible benefits to public transit.
