Plano, Texas August 25<sup>th</sup>, 2025

## **Luminator Technology Group Launches New Learning Management System to Elevate Customer Training Experience**

**Luminator Technology Group** is proud to announce the launch of its new Learning Management System (LMS), designed to deliver streamlined, role-specific training for customers across transit and transportation sectors. The LMS, powered by Appinium, marks a major milestone in Luminator's commitment to innovation, usability, and continuous learning.

"Our customers deserve training that's as intuitive and reliable as the technology we provide," said Pearl Lewis, Training Program Manager at Luminator. "This LMS is more than a platform, it's a gateway to faster onboarding, smarter troubleshooting, and deeper product understanding."

Key Features of the LMS include:

- **Training Calendar:** browse upcoming classes and register directly
- **Instruction-Led Classes:** see the sessions you've signed up for
- **Self-Paced Training:** access assigned courses you can complete anytime
- **Resource Library:** find manuals, how-to videos, and product documentation
- **Achievements:** track your certifications, competencies, and overall learning progress

The LMS is now live and accessible to all Luminator customers. Early adopters have praised its clarity, ease of use, and time-saving design.

Luminator will continue expanding the LMS with new product trainings, certification programs, and cross-functional learning opportunities. Customers are encouraged to explore the platform and share feedback to help shape future enhancements.

If you haven't received the "Welcome to Appinium" email prompting you to set your credentials, please email [training.na@luminator.com](mailto:training.na@luminator.com).

## About Luminator Technology Group

Luminator Technology Group (Luminator) is a leading manufacturer of stationary and on-board passenger information systems, video security, air treatment and lighting solutions for global mass transportation applications. The company, founded in 1928, leverages its extensive engineering resources to develop solutions that increase intelligence, safety and efficiency for bus, rail, and aerospace operations worldwide.
